

SOLAR BATTERY CHARGER

FOR BATTERY POWERED GAS PARKSAFE COOKING SYSTEMS

Designed to bolt onto a rafter of a Shelter it removes the need to regularly recharge the batteries on our Gas Parksafe Cooking Systems.

Alternatively the Solar Panel can easily be bolted to a Pole by removing the bottom half of the Bracket .

The bracket is manufactured using Stainless Steel for corrosion resistance.

The kit comes complete with a 4 watt Solar Panel secured in a Shelter Mount Bracket that holds the panel at the optimum angle for most areas, 10 metres of cable and a 12VDC Regulator.
